

Minutes of Meeting

Healthcare Chatbot Project

Meeting Details

- **Date:** February 11, 2026
 - **Attendees:** Client Team, Student Team (Vikesh, Advait, Venya, Amish, Keshav)
-

1. Key Discussions

- **Prototype Demonstration:** The student team presented a demonstration of the basic chatbot prototype featuring a user interface.
- **UMLS Dataset Provision:** The client confirmed that they will provide the required UMLS dataset once the pending license is acquired.
- **Multilingual Support Exploration:** While waiting for the dataset, the client instructed the team to research and determine how to implement support for multiple languages within the application.
- **Chat Data Storage:** The client requested that the team look into methods for storing chat data and history so that the information can be analyzed and learned from later.

2. Action Items

Task	Owner	Status
Provide UMLS dataset	Client	Pending License
Investigate multilingual implementation	Student Team	Immediate
Develop architecture for storing chats	Student Team	Immediate
