

Minutes of Meeting (MoM)

Meeting Details

Date: 1 April 2026

Attendees: Amish, Keshav, Venya, Advait, Vikesh, Client

Agenda

Discussion on codebase progress, system behavior, and next steps.

Discussion Points

- The team discussed further developments in the codebase and explained how different components of the system are currently functioning.
- The client suggested incorporating guardrails to ensure safer and more reliable system outputs.
- A discussion was held on evaluating the model's outputs without relying on human feedback, exploring possible automated evaluation methods.
- The client advised the team to proceed with thorough testing of the system.
- The client mentioned that they will review the progress and identify the remaining work from their side.

Action Items

- Implement guardrails in the system.
- Explore methods for automated evaluation of model outputs.
- Conduct comprehensive testing of the system.
- Await further instructions and feedback from the client regarding next steps.
